

The *Wisconsin* Chapter of BetterInvesting Presents

Finding Hidden Gems

Wednesday, March 30, 2022

7:30 pm CDT

People can go a lifetime looking for diamonds or precious jewels but never find them. In this session you will be handed hidden gems. Our three instructors: Barry Detloff, Dan Harter, and Dori Raser will focus their presentations on hidden gems from BI methodology as well as other methodologies that can help improve your portfolio's performance. We will show you where to find gems and how to use them to improve your stock studies and portfolio's return.

Barry Detloff has been with the Northern Lights Chapter since 1998. He has taught classes over a wide spectrum of topics; enjoys visiting clubs; ran the Chapter's computer group; and has been an officer. His investment club started in April of 1997 and is still going. Barry will cover simple technical analysis and how to read a candlestick chart.

Dori Raser is a director of the Golden West Chapter and the Rocky Mountain Chapter. She is President of the So Cal Model Investment Club and of the Rocky Mountain Model Stock Study Club. Dori is a retired Elementary School Assistant Principal and lives in Culver City, California. Dori will focus on the PERT and Diversification reports found in the Online Tools of Better Investing.

Dan Harter has been a member and volunteer of BetterInvesting for over 20 years. He's a treasurer and founder of two investment clubs and recently joined the BetterInvesting Volunteer Advisory Board as a national volunteer. Dan will focus on some of the many options available via the Research feature of the online tools like Member Sentiment, Analyst Estimates and the Filings and Transcripts feature.
