This session is being recorded for future use.

# Today's Agenda

Enhance your own stock studies using four tools:

- A First Cut stock study
- Comparison Chart Checklist
- SSGPLUS
- Big Charts from the Research Tab

## What is a First Cut?

- It is a preliminary look at a stock using a specific format
- It is not a complete stock study.
- It is a recommendation by a member(s) of the BI community to consider investing some of your time in further study.
- It should not replace your own analysis and opinion of a stock

## A First Cut includes:

- A completed SSG
- Answers to 5 or 6 SSG projection questions and information about:
  - How the company makes money
  - Why the company is a quality growth company
  - Whether to Buy/Hold/Sell or keep in the Stock Watch List
  - A explanation for the final recommendation

# Why Go Beyond a First Cut?

- It's your money/your club's money. You want the most complete analysis to make your decision
- It increases your self-confidence in your judgments and expectations.
- Practice making judgments and documenting your judgment choices results in making better future judgments

## Other Reasons to Do Your Own Study

So that in 1, 2, 3+ quarters from now you can

- Understand the root causes for all variances from your projections
- Compare actual results with your expectations.
- Take appropriate corrective action in a timely fashion.
- Make better future decisions.

## **Find First Cut Stock Studies**

# To start your own stock study

- 1. Open a new online SSG for TSCO. It will have updated: prices; PEs; Current/TTM EPS
- 2. Obtain *current* resources used in the First Cut.
- Read and compare the current resources to the First Cut content
- 4. Add additional resources and record your findings & your own judgments.

#### Enhance Your Stock Study Using a First Cut

created by Bob Houle 10/7/2020 / with Marcia Couey edits 6/1/2021

First Cut answers to these questions are	Level 1	Level 2	Explains if the company has a Durable Competitive Advantage (DCA). Compares company to Peers, Industry, and general market (S&P 500).	
Why is this a quality company?  (Comment on historical data, sales, earnings, etc.)	General description of the company from Wikipedia or popular financial websites. Description of sales and earnings 10-year trends.	Business description from 10K MD&A, highlighting the company's track record and growth strategy. Comment on PTP%, ROE, and debt. Discuss 10- and 5-year trends and any anomalies.		
2. Describe how the company makes money.	Lists products or services provided by the company.	Discusses and compares different sources of revenue (geographies, divisions, product lines, etc.) and how they contribute to overall sales.	Discusses growth prospects, expansion plans, operational advantages, customer retention strategies, new products or services that will protect DCA.	
3. The projected annual growth rate for sales for the next 5-years.	Uses "best guess" Analyst Consensus Estimates on SSG or average of Member Sentiment.	Assess Value Line, Morning Star, and Analyst Price Estimates to formulate a conservative sales growth projection.	Develops sales growth rate based on company growth strategy, trends in the industry, markets, and general economy. Explain starting point for projections (Annual, Quarterly, Trend)	
4. The projected annual growth rate for earnings for the next 5-years.	Uses "best guess" Analyst Consensus Estimates on SSG or average of Member Sentiment.	Uses Preferred Procedure calculation with defaults.	Listens to Earnings Call or reads transcripts and uses Preferred Procedure but applies judgments to one or more of the various defaults, based on research and historical data.	
5. Projected - High PE, Low PE, and Low Price	Uses the Projected High PE /Low PE from the SSG without any adjustments. Projected low price recent market low without any other explanation.	Considers outliers in data (lowering PE) and including an earnings adjustment for future accretive additions (new products or acquisitions). Considers low price with other downside information in selecting.	Everything in "Level 2" AND discusses which EPS (TTM, Last Year, etc) will be projected adding in other judgments on earnings. Uses or considers using variable earnings rates within the 5 years of projections.	

#### 6. Final Recommendation (Buy, Sell, Hold) or Add to Watch List explain:

Legend: MD&A = Management Discussion and Analysis as found in the Annual Report = 10K

Discuss why you consider this to be a high quality, growth company that should be investigated further. Please include comments on historical sales and EPS growth, pre-tax profit margin, return on equity, and debt.

Pet ownership has increased during this last year due to COVID 19. I began looking for a company that could benefit from pet ownership. TSCO revenues have grown 9.5% over the last 10 years and 31.4% in the 3<sup>rd</sup> quarter. Earnings per share have grown a ten year average of 15.7% and 58.6% in the recent quarter. Profit margins average 9.4% and ROE average is 32.3%. Debt to Capital is 69%. In the last year the debt to capital has risen due to a recent SEC rule that lease payments must appear on the balance sheet.

First Cut answers to these questions are	Level 1	Level 2	Level 3
1. Why is this a quality company?  (Comment on historical data, sales, earnings, etc.)	General description of the company from Wikipedia or popular financial websites. Description of sales and earnings 10-year trends.	Business description from 10K MD&A, highlighting the company's track record and growth strategy.  Comment on PTP%, ROE, and debt.  Discuss 10- and 5-year trends and any anomalies.	Explains if the company has a Durable Competitive Advantage (DCA). Compares company to Peers, Industry, and general market (S&P 500).

2

#### Briefly describe how the company makes money:

Tractor Supply is a specialty retailer selling products to recreational farmers. 47% of sales is livestock/pet products. 21% is tools, hardware, truck, and towing. 20% of sales is seasonal items such as mowers and snowblowers and gifts. 8% of sales is footware and clothing. In addition to the large stores, TSCO owns PetSense,180 smaller stores that offer vet and grooming services for pets, as well as toys and food supplies.

First Cut answers to these questions are	Level 1	Level 2	Level 3
2. Describe how the company makes money.	Lists products or services provided by the company.	Discusses and compares different sources of revenue (geographies, divisions, product lines, etc.) and how they contribute to overall sales.	Discusses growth prospects, expansion plans, operational advantages, customer retention strategies, new products or services that will protect DCA.

Projected growth rate for sales: 9.0%
Why did you select this rate? Discuss from where future growth will come.

The Value Line analyst estimate is 8% and Morningstar is 11%. There are plans for additional stores.

First Cut answers to these questions are	Level 1	Level 2	Level 3
3. The projected annual growth rate for sales for the next 5-years.	Uses "best guess" Analyst Consensus Estimates on SSG or average of Member Sentiment.	Assess Value Line, Morning Star, and Analyst Price Estimates to formulate a conservative sales growth projection.	Develops sales growth rate based on company growth strategy, trends in the industry, markets, and general economy. Explain starting point for projections (Annual, Quarterly, Trend)

4 Projected growth rate for earnings per share: 11% Why did you select this rate?

Analyst estimates range from 10% at Value Line to 16% at Yahoo. I chose a conservative numer in between those estimates. Pet ownership has grown and pets are cared for as members of the family.

First Cut answers to these questions are	Level 1	Level 2	Level 3
4. The projected annual growth rate for earnings for the next 5-years.	Uses "best guess" Analyst Consensus Estimates on SSG or average of Member Sentiment.	Uses Preferred Procedure calculation with defaults.	Listens to Earnings Call or reads transcripts and uses Preferred Procedure but applies judgments to one or more of the various defaults, based on research and historical data.

5 Projected High P/E: 25 Why did you select this value?

I used the average high PE after eliminating the 2015 high PE

Projected Low P/E: 16

Why did you select this value?

I used the average low PE after elimination of the 2015 PE

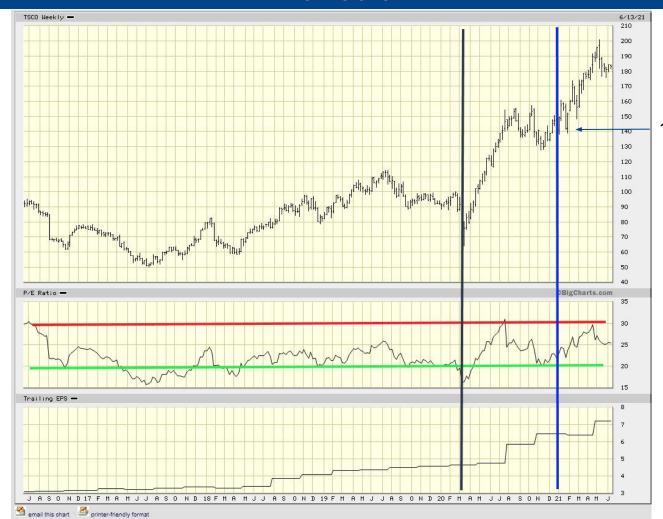

Projected Low Price: \$103 Why did you select this value?

I used the low PE multiplied by the estimated low earnings /share

First Cut answers to these questions are	Level 1	Level 2	Level 3
5. Projected - High PE, Low PE, and Low Price	Uses the Projected High PE /Low PE from the SSG without any adjustments. Projected low price recent market low without any other explanation.	Considers outliers in data (lowering PE) and including an earnings adjustment for future accretive additions (new products or acquisitions). Considers low price with other downside information in selecting.	Everything in "Level 2" AND discusses which EPS (TTM, Last Year, etc) will be projected adding in other judgments on earnings. Uses or considers using variable earnings rates within the 5 years of projections.

# 6. Final Recommendation (explain)

At the current price, the stock is a (check one):							
⊠Buy or □Hold or □Sell							
At the current price, the upside-downside ratio is: 3.5 to 1							
Compound Annual Return – Using Forecast High P/E: 15%							
Your final recommendation (check one):							
⊠Buy or □Hold or □Sell							
Explain:							

Tractor Supply is in the Retail Building Supply Industry, which for the last 5 months has been the number one industry in Value Line. I think pet ownership will be here to stay with pet ownership increasing in the Millennial Generation, especially with the work at home trend due to COVID19. Tractor supply also sells items for the home and yard, another trend that is growing.

Enhance Your Stock Study Using a First Cut

created by Bob Houle 10/7/2020 / with Marcia Couey edits 6/1/2021

First Cut answers to these questions are	Level 1	Level 2	Level 3
1. Why is this a quality company?  (Comment on historical data, sales, earnings, etc.)	General description of the company from Wikipedia or popular financial websites. Description of sales and earnings 10-year trends.	Business description from 10K MD&A, highlighting the company's track record and growth strategy. Comment on PTP%, ROE, and debt. Discuss 10- and 5-year trends and any anomalies.	Explains if the company has a Durable Competitive Advantage (DCA). Compares company to Peers, Industry, and general market (S&P 500).
2. Describe how the company makes money.	Lists products or services provided by the company.	Discusses and compares different sources of revenue (geographies, divisions, product lines, etc.) and how they contribute to overall sales.	Discusses growth prospects, expansion plans, operational advantages, customer retention strategies, new products or services that will protect DCA.
3. The projected annual growth rate for sales for the next 5-years.	Uses "best guess" Analyst Consensus Estimates on SSG or average of Member Sentiment.	Assess Value Line, Morning Star, and Analyst Price Estimates to formulate a conservative sales growth projection.	Develops sales growth rate based on company growth strategy, trends in the industry, markets, and general economy. Explain starting point for projections (Annual, Quarterly, Trend)
4. The projected annual growth rate for earnings for the next 5-years.	Uses "best guess" Analyst Consensus Estimates on SSG or average of Member Sentiment.	Uses Preferred Procedure calculation with defaults.	Listens to Earnings Call or reads transcripts and uses Preferred Procedure but applies judgments to one or more of the various defaults, based on research and historical data.
5. Projected - High PE, Low PE, and Low Price	Uses the Projected High PE /Low PE from the SSG without any adjustments. Projected low price recent market low without any other explanation.	Considers outliers in data (lowering PE) and including an earnings adjustment for future accretive additions (new products or acquisitions). Considers low price with other downside information in selecting.	Everything in "Level 2" AND discusses which EPS (TTM, Last Year, etc) will be projected adding in other judgments on earnings. Uses or considers using variable earnings rates within the 5 years of projections.

#### 6. Final Recommendation (Buy, Sell, Hold) or Add to Watch List explain:
